

## Creative tip EFAPLAST „Farm mobile“

### Accessoires

### Step 1

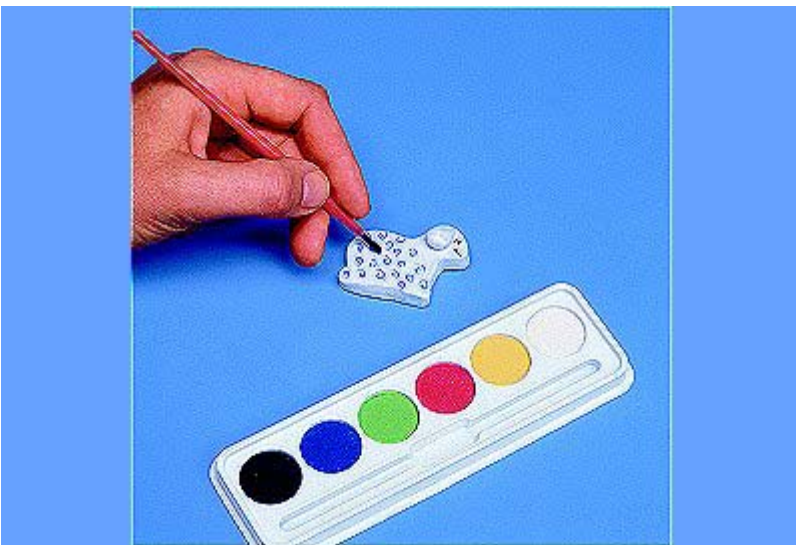

Roll out white EFAPLAST light on a work surface and, using the cutters, cut out the animals.

## Step 2

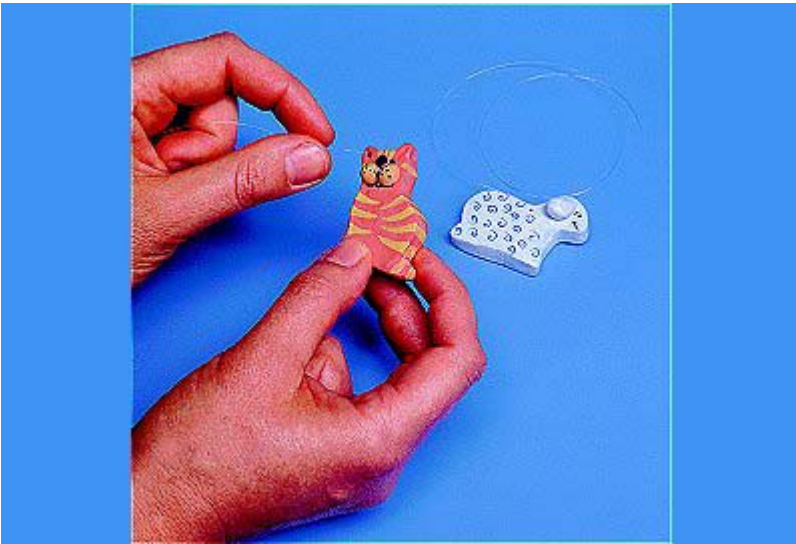

Shape ears, nose and tail and attach. Then, depending on the size and thickness of the respective animal, leave to dry for several hours. Turn the animals over every now and again in order to ensure that they dry thoroughly.

## Step 3

Once dry, the animals can be painted.

## Step 4

Mit einer Nadel ein Loch stechen und Nylonfaden durchfädeln. Anschließend nur noch am Mobile befestigen und aufhängen.
